

Commercial Tire Maintenance, Monitoring, Inflation

Denied by Warranty

Assemblies that are denied by a warranty claim will have a failure to perform caused by one or more of the following reasons:

1. **Missing Parts** - If AiRGO receives an assembly that is missing parts such as a Rotary Union without a check valve fitting, or Control Panel without an elbow or pressure switch.
2. **Broken Off Parts** – Hoses with broken Swivel Connections or Rotary Unions with broken check valve fittings.
3. **Altered Assemblies** – Unauthorized replacement of AiRGO parts with bolts, screws, caulk, plugs or bending of hose fittings.
4. **Excessive Oil / Grime** – Assemblies that have so much substrates that it is caked on the part.
5. **Abused Subassemblies** – Massive gashes, scarring, indentation of subassemblies. Our warranty claims that there can be no abuse of Airgo parts.
6. **Improper Installation** – Assemblies that have been installed improperly. For example grinding or sawing of our Rotary Union Delivery Stems.
7. **Parts returned that are not Airgo Parts** – AiRGO cannot replace parts that we do not manufacture. Parts that are not manufactured by AiRGO Systems will not be evaluated.
8. **Improper Paperwork** – Parts must be returned with the proper paperwork in order for Airgo to process a warranty claim. Fax your invoice 405-844-5891 then Call AiRGO Systems at (405) 346-5807 to begin a warranty claim.
9. **Expired Warranty** – If you have purchased your system over three years ago.
